jargal pj

I am a highly motivated and Accounting student with a strong interest in auditing, finance, ESG research, credit analysis, and technology-driven business solutions. I am passionate about applying my analytical thinking, communication, teamwork, and problem-solving skills in a dynamic and challenging professional environment. My academic and professional interests focus on financial reporting, audit procedures, risk assessment, ESG and sustainability-related research, banking and credit analysis, and the use of technology to improve efficiency, accuracy, and decision-making. Through my experience as an Assistant Auditor at Onch & Company, I have gained practical exposure to audit documentation, financial statement analysis, client communication, and research-based tasks, which have strengthened my understanding of real business processes and professional standards.
